

# Novus Attenzia

Premium lighting – made in Germany

Novus Attenzia luminaires

# ILLUMINATE WORKSTATIONS WITH STYLE.

There is an increasing need for flexible and customised lighting concepts for office workers. These solutions have to meet relevant energy efficiency specifications and standards, but visual and ergonomic considerations are also important. The Novus Attenzia lighting series puts the spotlight on the needs of the people behind the desks. Tasteful design, superior functionality and highest quality “Made in Germany” make Attenzia standing and desktop luminaires the ideal choice for perfectly lit workstations.

## Many facets of light

Neo, space, task or complete – our range of Attenzia luminaires adds many facets to lighting. With their clean, elegant design that is both eye-catching and understated, Attenzia neo free-standing luminaires blend harmoniously into a variety of furnishing concepts and offer a wide range of options for active and healthy working. Attenzia space active HCL free-standing luminaires bring the dynamics of natural light into buildings to support the body clocks and biorhythms of the people who work there. Bluetooth controls enable smart application, while the luminaire head with three rotatable LED panels allows light to be directed precisely as needed. The NOVUS Attenzia task and NOVUS Attenzia complete desktop luminaires focus their light directly onto the user’s workstation, ensuring that it is always perfectly lit and they can tackle even challenging tasks without the distraction of diffused light.

## Made in Germany

All Novus Attenzia luminaires are developed and manufactured at our plant in Lingen, Germany. This ensures that our products are always of the very highest quality – so you can enjoy our premium luminaires for long time.

## Perfect team players

The various workstation solutions from the Novus more space system can be combined flexibly with the Attenzia series lights to create a smart, modern and above all ergonomic office concept. Assemble your perfect workspace with our monitor support arms, organisation walls and many other products – custom-made, individual, tailored perfectly to your needs!

## Attenzia neo

# HELLO NEO!

Attenzia neo lights are the perfect professional all-purpose lights for a wide variety of applications, from single and double workstations through open-plan offices to your office at home. They supply both direct and indirect light to illuminate your workstation evenly, broadly and with almost no glare, allowing you to concentrate on your work and avoid fatigue.

Our elegant premium luminaires are highly customisable: alongside our starter model neo and the neo+ with its expanded features, they come in two colour temperatures and three different colours. This combination of minimalist design, high-grade and durable materials and outstanding quality "Made in Germany" makes Attenzia neo lights an excellent addition to any office workstation.

### Goodbye to glare!

Our sophisticated reflector lens system achieves optimal lighting with extremely low glare values: thanks to an innovative LED light system, 25 percent of the emitted light falls directly onto the desk space, while LED light strips on the upper side of the lamp shine 75 percent of the light towards the ceiling for indirect illumination. Visually, the two luminaire models can be distinguished by the number of anti-glare screens they have: the Attenzia neo features two module arrays with seven LED anti-glare screens each, while the neo+ has three arrays.

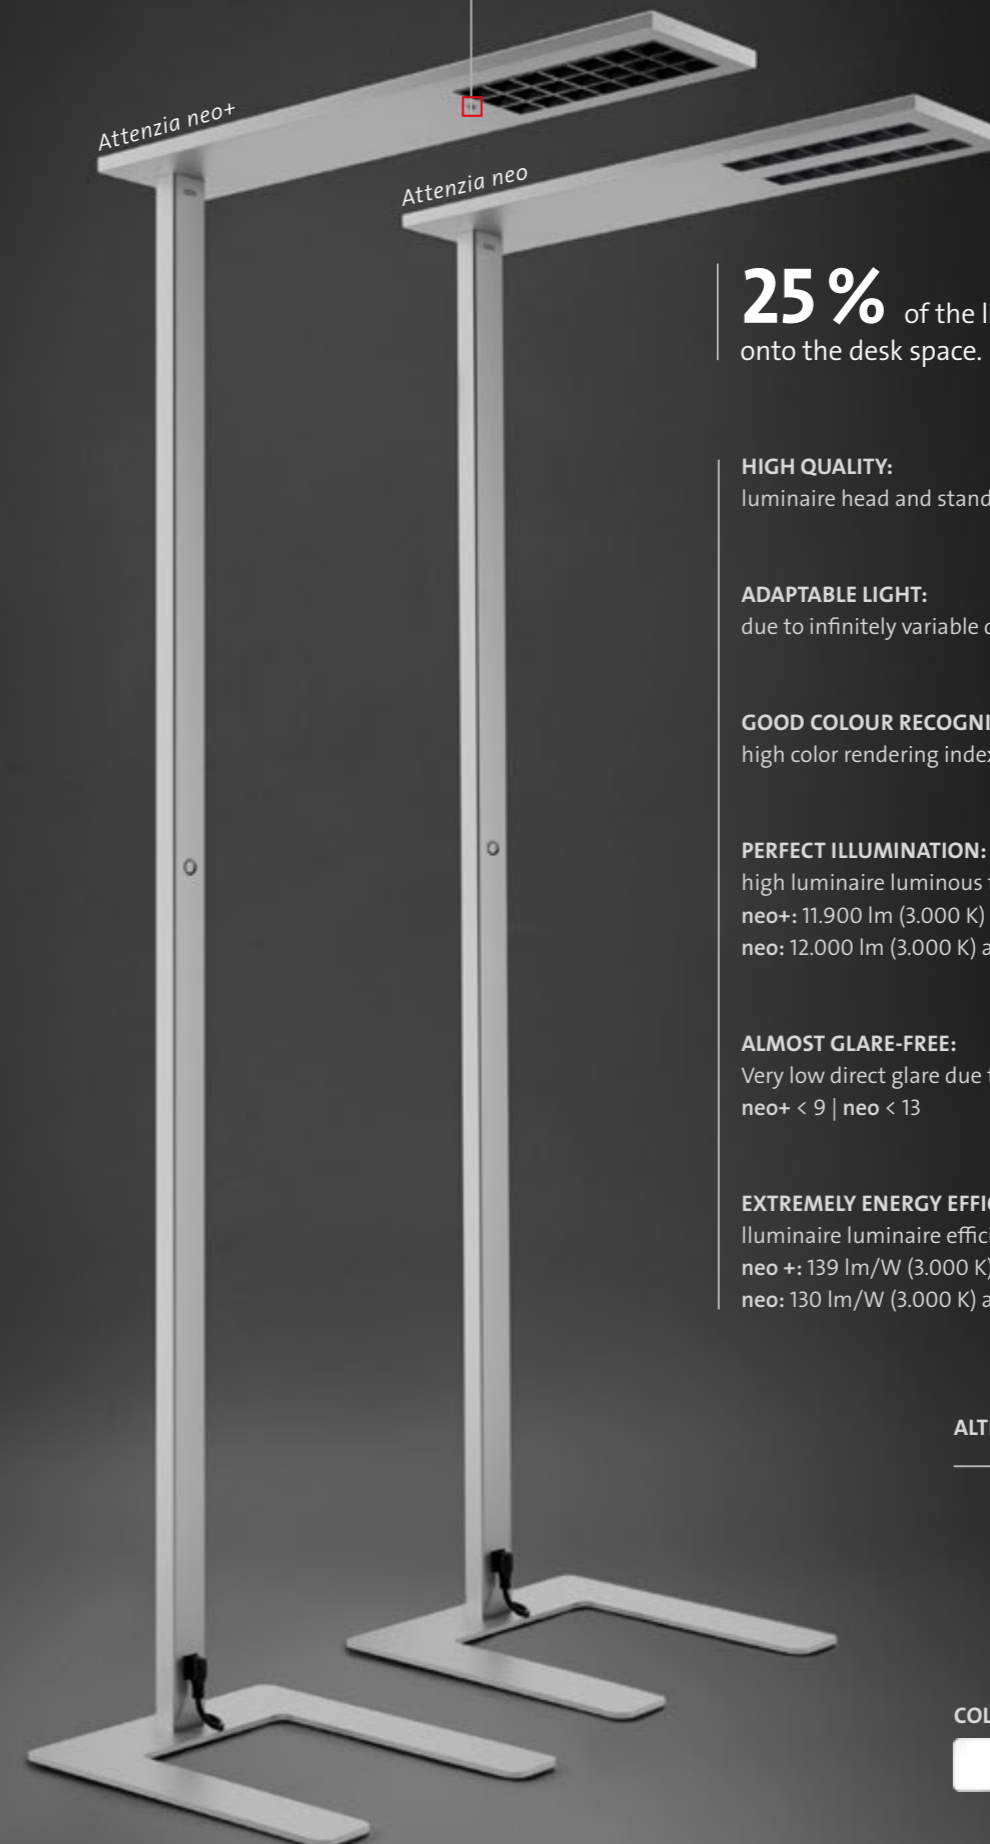

### Intelligent sensor technology

All Attenzia neo luminaire models are infinitely dimmable. The neo+ also has an efficient multi-sensor that detects presence and ambient light intensity and automatically outputs the ideal amount of light.

**COMFORTABLE OPERATION:**  
automatic presence and light  
Light control via the multisensor

**75%** of the light provides  
indirect illumination.

**25%** of the light falls directly  
onto the desk space.

**HIGH QUALITY:**  
luminaire head and stand profile made of aluminum

**ADAPTABLE LIGHT:**  
due to infinitely variable dimming function

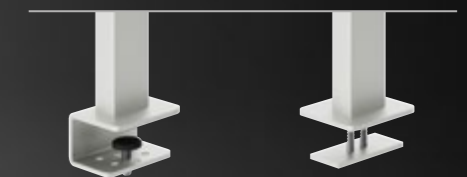

**GOOD COLOUR RECOGNITION:**  
high color rendering index of > 80

**PERFECT ILLUMINATION:**  
high luminaire luminous flux of  
neo+: 11.900 lm (3.000 K) and 12.421 lm (4.000 K)  
neo: 12.000 lm (3.000 K) and 12.167 lm (4.000 K)

**ALMOST GLARE-FREE:**  
Very low direct glare due to a UGR value of  
neo+ < 9 | neo < 13

**EXTREMELY ENERGY EFFICIENT:**  
luminaire luminaire efficiency with  
neo+: 139 lm/W (3.000 K) and 146 lm/W (4.000 K)  
neo: 130 lm/W (3.000 K) and 133 lm/W (4.000 K)

**ALTERNATIVE MOUNTING OPTIONS:**

**COLOURS:**

## Attenzia space active HCL BT

# ALLWAYS THE RIGHT LIGHT..

Light is not just visually perceived, it also affects humans biologically: daylight controls our natural diurnal rhythm, so our body knows when it needs to be awake and active and when it's time to rest and regenerate. Artificial light disrupts this cycle, leaving our bodies unable to distinguish between day and night, which can negatively impact our health. The innovative Human Centric Lighting (HCL) technology in the NOVUS Attenzia space active HCL lamp can help by replicating the functions of daylight in artificially lit rooms. Using brightness and colour temperature, Novus HCL lamps emulate the way light changes over the course of the day, from cool and energising in the morning to warm and relaxing in the evening. In combination with an intelligent control system, this state-of-the-art lighting concept is designed to support both active phases and times of relaxation, providing a visual stimulus to boost performance, concentration and well-being in the office.

### Variable and flexible to the power of three

Direct meets indirect light: the three rotatable, variably adjustable LED panels are the unique centrepiece of our NOVUS Attenzia space luminaires. The moveable panels can be freely positioned by hand to achieve targeted lighting in larger workspaces, allowing the balance of light to be flexibly distributed and altered as required to ensure that light from the LEDs falls where it is needed most. This functionality also guides the lamp's unique design with its slimline arm joint, finely adjustable rotation axes, and well-proportioned LED panels.

### Light in its most elegant form

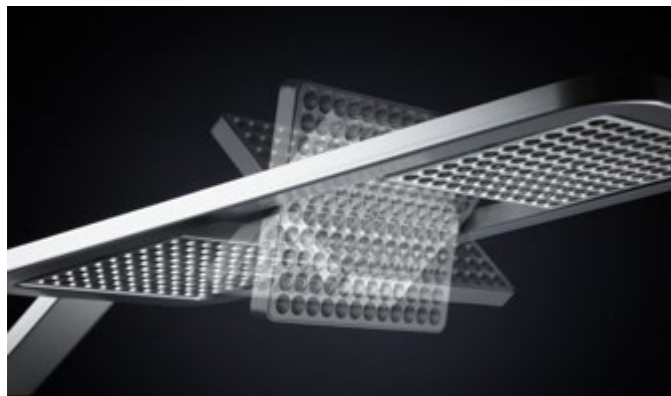

Attenzia space luminaires bring rooms to life – and make them enjoyable! These elegant, high-powered lamps stand out due to both their elegant design and their sophisticated technology. With well thought-out functionalities such as a presence and light sensor or infinitely dimmable power, their premium features make your working life noticeably easier.

### Individually adjustable

Download the free Lumobi app from the app store to individually adjust and control your luminaire and save personal lighting scenes that create the perfect ambiance at a single click. It couldn't be easier.

### Limitless flexibility

270° rotatable panels and extremely bright LEDs allow you to individually choose between direct and indirect lighting. Anti-glare screens and deep light cones on the light panels provide optimal glare protection.

### Intelligent light

The light sensor detects ambient light intensity: it turns the lamp off during strong daylight and automatically turns it on when it gets dark. The presence sensor autonomously dims the luminaire after 20 minutes, then turns it off entirely one minute later.

**PERFECT ILLUMINATION:**  
high luminaire luminous flux of 10.600 lm

**GOOD COLOUR RECOGNITION:**  
high colour rendering index of 84

**EXTREMELY ENERGY EFFICIENT:**  
luminaire luminaire efficiency with 114 lm/W

**GLARE REDUCTION:**  
low glare due to a UGR value of < 19

**COLOURS:**  

**HIGH QUALITY:**  
high-quality surface finish, filigree and elegant appearance

**LIGHT PANELS:**  
rotatable by 270°, dimmable and with optimal glare control via glare grids with deep light cones

**HCL-TECHNOLOGY:**  
varies the illuminance and colour temperature over the course of the day based on the natural sunlight (2.700 – 6.500 K)

**CONVENIENT OPERATION:**  
easy automatic operation thanks to presence and light detection via the multisensor

**BASE:**  
fits optimally under the frame of height-adjustable tables

Attenzia task  
und Attenzia complete

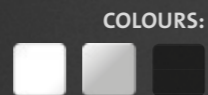

# SMART TECHNOLOGY AND ELEGANT DESIGN

The lighting expertise we have built at Novus also makes us the perfect choice for desktop luminaires. Our portfolio includes the Attenzia task and Attenzia complete, especially bright high-performance luminaires featuring sophisticated technology. Their extremely high lumen output, which is outstanding and unmatched on the market, guarantees that your desk is optimally lit and you can focus on your work. And their minimalist design combined with seamless workmanship and fully internal and thus invisible cabling blends perfectly into a wide variety of office furnishing concepts, making our luminaires long-term stylish companions in the office.

## Attenzia task

**INFINITELY ADJUSTABLE JOINTS:**

For perfect positioning of the luminaire head

**AUTOMATIC SWITCH-OFF:**

can be dimmed to any level and switches off automatically after 10 hours

**PERFECT ILLUMINATION:**

high luminaire luminous flux of 918 lm

**INFINITELY DIMMABLE:**

For the right illumination for the work task

**MATERIAL:**

High quality surface finish – aluminium arm and luminaire head

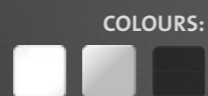

**LED-TECHNOLOGY:**

The 49 LEDs have a lifetime of more than 50.000 hours

**COLOUR TEMPERATURE:**

available in 3000 K and 4000 K

## Attenzia complete

**AUTOMATIC SWITCH-OFF:**

can be dimmed to any level and switches off automatically after 10 hours

**EXTREME HIGH LUMINOUS FLUX:**

1.708 lm provide the perfect illumination for challenging tasks in the workplace.

**INFINITELY DIMMABLE:**

For the right illuminance for the work task.

**MATERIAL:**

High quality surface finish – aluminium arm and luminaire head

**LED-TECHNOLOGY:**

The 108 LEDs have a lifetime of more than 50.000 hours.

**COLOUR TEMPERATURE:**

available in 3000 K and 4000 K

## Adaptable to your needs

Attenzia desktop luminaires are highly customisable and extremely flexible. Both the Attenzia task and the Attenzia complete are available in three different colours and with a variety of installation options – a base, a pin for mounting them on NOVUS MY columns, or the option to attach them to TSS columns or organisation walls – so they combine easily with your existing office furnishings.

## And there's more

As a manufacturer, Novus offers vast experience and competence in furniture adaptation. This means our lights can be adjusted to fit a range of existing furniture systems. From grommet and screw-on mounts through flexible attachment to system rails to optimal lighting for benching workstations – anything is possible with Novus.

## Novus More Space System

# SO MUCH MORE THAN “JUST” LIGHT.

Novus Attenzia luminaires open up a wide variety of lighting options around workstations and make work easier. But that's not all: our lighting range is just one of the many solutions in the holistic Novus More Space System. This business segment covers all aspects of efficient, user-friendly workplace design – from optimal desk lighting to use of what is known as the “third level” to work ergonomically and gain more space. Novus has many years of experience as a leading supplier of high-quality monitor support arms. The German brand manufacturer has built up extensive and proven know-how as a solution provider for workstations that meet highest standards of ergonomics, comfort and design.

All the solutions in the Novus More Space System can be flexibly and individually combined into a modular system, enabling you to develop tailor-made workstation concepts and create state-of-the-art workspaces at home and in the office. That's how Novus lives up to its motto “We make work easier”!
