

The Office

(R)EVOLUTION

novus[®]

Colourful staplers and
hole punches in a compact format:
Boring was yesterday!

When organisation meets colour, it creates a (r)Evolution in the office. The compact staplers and hole punches in the Evolution series by Novus offer outstanding functionality and versatility, and on top of that they come in six vibrant colours you'll love. Boring was yesterday – these tools bring a splash of colour to your filing!

Colours

Six colourful highlights

Classic love-apple red, cheeky green, bold petrol, calm blue, hot pink – or perhaps you prefer a minimalist, clean black? With the Evolution series by Novus, organising becomes your way to make a statement. Every colour is gently set against a light grey for a perfect contrast that lets the colours shine, turning the Evolution staplers and hole punches into highlights that are both extremely useful and extremely stylish on your desk. Now filing is actually fun!

Staplers

Handy, stylish, versatile

The Evolution series includes two staplers perfectly designed for your workflow: the compact NOVUS E 15 stapler for up to 15 sheets and the NOVUS E 20 for up to 20 sheets. Both devices feature an integrated staple remover on the back in case there's ever a staple you need to undo, making them true all-rounders and perfect for use in the office or on the go. Handy, stylish and versatile: with the Evolution series, stapling is a child's play.

Hole punches

Organised in the blink of an eye

The compact NOVUS E 210 hole punch can perforate up to 10 sheets at once, while the larger NOVUS E 216 can handle as many as 16 sheets. Both models are versatile assistants for your everyday office tasks. Their non-slip base ensures secure positioning, different paper formats allow maximum flexibility – and before you know it, all your documents are neatly filed. Making organising fun and office work easy.

Quality

Lasting enjoyment

We know that in addition to awesome colours and functionality, our Evolution office equipment also delivers excellent quality. That's why Novus offers a ten-year guarantee on all Evolution products if they are used as intended – giving you certainty and lasting enjoyment in the workplace.

Packaging

Only what's really necessary

The packaging for our Evolution staplers, hole punches and sets is intentionally kept to a minimum – there couldn't be less, there needn't be more. And of course there's no plastic at all. Keeping everything simple, handy and neat.
